

A sensor on Hastings Pier is monitoring waves and transmitting live data over the World Wide Web. Teacups in The Hub connected to this data are exhibiting some rather unusual behaviour in response. Hastings has experienced twelve major storms over the past twelve months, and another could soon be on its way...

*Read about wave watching from Hastings Pier*

*Watch waves live on the World Wide Web*

*Create your own project using wave data*

*Visit teacups at The Hub* between 15th April and 9th June. For opening days and times see [The Hub](#). Meet the artist and technologists behind the project at The Hub on 15th May at 11am, 1pm, & 3pm.
